Microsoft Partner of the Year 2023 With tremendous pride we announce that Qatar Datamation Systems has been awarded "Microsoft Partner of the Year 2023" in Qatar. QDS is a leading Microsoft partner renowned for its expertise in providing end-to-end cloud solutions, facilitating digital transformation, and driving business growth. With a deep understanding of the power of the cloud, QDS continues to enable organizations to harness innovative technologies and unlock new opportunities for success. Our commitment to delivering success along with our vigorous partnership with Microsoft we continue to endeavor untread paths, redefining success. Modernization of Web Applications on Microsoft QDS has earned the Public Cloud Partner of the Year Award 2020 As we work towards our strategic vision to be the best provider of IT Services and solutions in Qatar, we proudly announce being a winner of Fortinet Public Cloud Partner of the Year Award 2020! In QDS we truly believe that together with our esteemed partners can make a positive contribution to IT market and Qatar market in particular, Appolinaire Morino, Regional Sales Manager- Public Cloud Middle East/Fortinet declared:" one partner in particular that gain the skills to be able to install and support public cloud, with the minimal support of Fortinet. The result was highly strategic won, therefor as a recognition of the achievement, it is a great pleasure to recognize QDS as Public Cloud Partner of the year 2020." QDS has earned the Public Cloud Partner of the Year Award 2020 Qatar-(date) -Qatar Datamation Systems has been Qatar's leading IT service provider serving businesses throughout the country for more than three decades. Today Qatar Datamation Systems (QDS) proudly announced it has earned the Windows Server and SQL Server Migration to Microsoft Azure advanced specialization, a validation of a solution partner's deep knowledge, extensive experience and expertise in migrating Windows Server and SQL Server-based workloads to Azure.Only partners that meet stringent criteria around customer success and staff skilling, as well as pass a third-party audit of their migration practices, are able to earn the Windows Server and SQL Server Migration to Azure advanced specialization.As companies look to modernize their applications and take full advantage of the benefits that cloud computing can deliver, and with the recent end-of-support for Windows Server 2008 R2 and SQL Server 2008 R2, they are looking for a partner with advanced skills to assess, plan, and migrate their existing workloads to the cloud. "We are committed to delivering highly effective business outcomes and results to our clients, Earning an advanced specialization from Microsoft provides another level of expertise to our comprehensive list of services that will enable us to help our clients capitalize on using cloud-based modern technology to drive digital transformation." Muhammad Ali Khan – Manager Business Applications. Gavriella Schuster, Corporate Vice President, One Commercial Partner (OCP) at Microsoft Corp. added, "The Windows Server and SQL Server Migration to Microsoft Azure advanced specialization highlights the partners who can be viewed as most capable when it comes to migrating Windows-based workloads over to Azure. Qatar Datamation Systems (QDS) clearly demonstrated that they have both the skills and the experience to offer clients a path to successful migration so that they can start enjoying the benefits of being in the cloud." Microsoft Azure Marketplace About Qatar Datamation systems (QDS) QDS provides the solutions to its customers' IT problems. Doha, Qatar —Aruba Channel Awards 2019- "Security Partner of The Year 2018" Qatar Datamation Systems was awarded by Aruba Networks the "Security partner of the year 2018" for Qatar.QDS was awarded one of the biggest and strategic IT projects in Doha 2018 for Smart Campus based on Aruba Networking as main infrastructure which allowed us to win this award.The project contains the following solutions:Aruba Mobility Controllers for advanced WLAN services for high-performance, high density enterprise requirementsAruba Wireless Access Points (+3000) – indoor/ outdoorAruba ClearPass Policy Manager, The most advanced Secure NAC platform availableAruba Network Switch for enterprise class resiliency with innovative flexibility and scalability for customers creating smart digital workplaces that are optimized for mobile users with an integrated wired and wireless approach. Qatar Blockchain Summit 2018 Connecting Global Business Leaders & Government Visionaries Qatar Datamation Systems would like to thank its customers for making the first ever Blockchain event in Qatar a roaring success.Qatar Blockchain Summit 2018, held at the Kempinski in Doha on the 20th of November, provided a gateway to the latest innovative thinking and applications in Blockchain, and an inspirational meeting ground for top technology practitioners and industry experts from all sectors such as Government, Telco, Banking, and Finance as well as

regulators from the Blockchain ecosystem.The aim of the event was to establish a collective vision on Qatar's Blockchain adoption journey, after looking at real life and production grade implementation examples of Blockchain based platforms in the Digital Government and Transformation as well as in Financial Regulation and Supervision space. The Blockchain Summit showcased the most cutting-edge and forward-thinking trends, technology, and use cases within the Blockchain space. The event attracted a lot of interest and excitement from customers and partners to establish a think-tank that creates an industry wide vision for the adoption of Blockchain technology.Again, we thank you for your interest and participation in the Qatar Blockchain Summit 2018 and we very much look forward to working with you in transforming the industry.QDS would also like to thank our Partners Microsoft and Avanza Innovations for sharing their knowledge and successes in the Blockchain space and for making this event a success. QITCOM News Doha, Qatar — March 12th, 2017 — Qatar Datamation Systems participated in QITCOM 2017, which is Qatar's biggest digital event. It is the fourth edition of Qatar's information and communication technology exhibition and conference.This event was held within the span of three days from the 6th to the 8th of March at the Qatar National Convention Center, bringing together both international and local experts, specialists, key government decision makers, innovators, and entrepreneurs in the field of Information Technology.Qatar Datamation Systems, as a Microsoft Gold Partner, was stationed within the Microsoft Booth, which gave the QDS Team many opportunities to share ideas and connect with fellow partners.This event also paved a way for the QDS Team to interact with new clients who were interested in what the company had to offer, as well as strengthen ties with clients who were already associated with Qatar Datamation Systems and its partners.Qatar Datamation Systems is very honored to become exhibitors at such global events and the team looks forward to attending future exhibitions that can help local companies such as QDS to globalize and share their solutions.Qatar Datamation SystemsFor additional information:203 GRIDCO III C RING RoadDoha, Ad Doha 13856Phone: +974 44439900Fax: +974 44432154 Moving Milaha to Cloud QDS has successfully moved Milaha operations to cloud with Office 365, SharePoint 2016, etc.Qatar Navigation, also known as Milaha, is one of the biggest maritime logistics, oil, gas, and transportation companies in the Gulf region, which meant it was sometimes difficult to manage all of their data. With the help of QDS, the Milaha IT Team established Azure's trustworthiness and security around clients accessing Milaha applications via a web-based access panel. An important component within this was extensive penetration testing by a security expert, who concluded that the service was secure. QDS also helped launch Office 365 for Milaha so that it provided fast performance, and 24/7 support. QDS believes that Azure is the foundation for looking forward into the future, enabling companies to optimize the IT costs and normal expenditures, while creating space and cost savings for innovation that may lead to further improved cost efficiency in the long term.Microsoft Case Study:https://customers.microsoft.com/en-us/story/milaha-logistics-office365-azure-cloud-services-sharepoint-server-2016-en Qatar Datamation Systems recognized as 2016 Microsoft Country Partner of the Year for Qatar 2nd Year in a Row Doha, Qatar — May 31st, 2016 — Qatar Datamation Systems today proudly announced it has won the 2016 Microsoft Country Partner of the Year Award for Qatar for 2nd Year in a Row. The company was honored among a global field of top Microsoft partners for demonstrating excellence in innovation and implementation of customer solutions based on Microsoft technology."Winning The Microsoft Partner of the Year 2016 Award twice in a row is the greatest acknowledgement of our efforts to align our growth strategy with the Microsoft Devices, Cloud, Productivity, and Business Processes ideologies. It is an honor to be recognized for our leading role in the Microsoft Partner ecosystem in Qatar as well as for the success of the innovative solutions we have designed and implemented for our customers," said Mohammad Alam, General Manager of Qatar Datamtion Systems.Awards were presented in several categories, with winners chosen from a set of more than 2,500 entrants from 119 countries worldwide. QDS was recognized for providing outstanding solutions and services, as well as representing excellent subsidiary engagement in Qatar.The Microsoft Country Partner of the Year Awards honor partners at the country level that have demonstrated business excellence in delivering Microsoft solutions to multiple customers over the past year. This award recognizes QDS as succeeding in effective engagement with its local Microsoft office while showcasing innovation and business impact, driving customer satisfaction, and winning new customers."Digital and cloud are transforming the ways in which company work, engage with

customers and contribute to the bottom line," said Muhammad Ali Khan, Manager – Business Applications, QDS. "Qatar Datamation Systems's dedication to providing outstanding value for our mutual customers is a prime example of the excellence we see in our talented community of Microsoft partners."The Microsoft Partner of the Year Awards recognize Microsoft partners that have developed and delivered exceptional Microsoft-based solutions over the past year. A gaint media House migration QDS has done the Biggest Migration of an On Premises Datacenter to Microsoft AzureQDS has accomplished one of the biggest On-Premises Datacenter migration to Microsoft Azure Cloud. A video case study has been published on Microsoft site. The project required a lot of deliberating and strategic planning. QDS placed its highly skilled and experienced workforce to deliver all of the requirements of the customers. The project was comprised a lot of things like to migrate the whole infrastructure, business applications that are not limited to ERP, CRM, SharePoint, and custom developed application. QDS also took advantage of Microsoft SAAS offerings to host email servers, Microsoft projects, CRM and On Office 365. QDS always has demonstrated its innovative abilities and successfully raised the bar in technology and related services which can be comprehended through customer's gratification and satisfaction.Microsoft Video Case Study:https://customers.microsoft.com/Pages/CustomerStory.aspx?recid=22519 QDS has been appointed to deliver DataCetner development and Migration project for one of the biggest tv channel in Qatar QDS recognized as a trusted partner for providing services and solutions to one of the largest TV Channel of QatarDespite of aggressive local competition, QDS has been selected with the opportunity to work with one of the biggest media house. QDS was accountable for building a whole new data center for this very global network of the channels. The project started with building a new data center which included Servers, Storage, Network Infrastructure, Security Solutions, ITSM solutions, and Private cloud Implementation based on Microsoft Solutions. QDS is also providing with the services of migrating 2500 users to the new date center, migration of Applications, ERP, Collaboration Platform, ITSM Solution, Etc. Microsoft Surface creating evolution in the world of education QDS has been awarded with an extraordinary strategic solution project to create significant impact in the sector of

education. The project is an alliance with the most prestigious educational organization, Supreme Education Council, Qatar. The vision of the project is to digitize the classroom which will be a dynamic shift in education. The project introduces a new technology, software, eLearning content and activities into the classroom. This amazing approach will allow students and faculty members to explore new ideas, challenge oneself through personalized learning paths and lastly, to express oneself in a completely different and unique way which was never done before. Therefore by sharing same perspective towards educational improvement, the two parties took initiative to deploy Microsoft technologies and Microsoft Surface devices. Introducing such technology to the classrooms will enhance reading, typing and learning experience of the students. This step assures the alteration of typical education mindset. Such triumph reflects QDS commitment to enrich the Qatari education system and give back to the community. Aruba Networks Installs One of the Middle East's Largest Wireless Networks for the Hospitality Industry at Ezdan Hotels West Bay in Qatar Enterprise-Class Wi-Fi Network Able to Support more than 32,000 Mobile Devices across 3,000 Guest Rooms and Hotel FacilitiesTuesday, October 28, 2014 5:00 am PDTDUBAI, United Arab EmiratesDUBAI, United Arab Emirates–(BUSINESS WIRE)–Aruba Networks, Inc. (NASDAQ:ARUN) has successfully completed one of the Middle East's largest wireless LAN projects in hospitality at the 3,000 room Ezdan Hotels West Bay in Qatar. In addition to enabling complimentary Wi-Fi services across the facility, the Aruba wireless overlay design dramatically cuts network cabling costs."Today Wi-Fi is an essential technology to satisfy travellers who expect to stay connected at all times," said Samer Habbouch, Territory Manager, Qatar at Aruba Networks. "Although most guests expect Wi-Fi to be a free service, they are quick to vocalize their dissatisfaction if the wireless quality is not up to mark. Aruba's enterprise-class mobility solution has enabled Ezdan to provide its guests with hassle-free, secure and reliable Internet access."According to Ezdan Hotels West Bay, the decision to select the Aruba wireless solution was based on the proactive support of Aruba Networks and its integration partner, Qatar Datamation Systems (QDS), and Aruba's ability to centrally manage and automate labor-intensive tasks. This was particularly important given the large size of the property, which made manually configuring and maintaining Access Points (APs) a significant challenge.While the Hotel continued to operate at full capacity, QDS completed the deployment in just three months avoiding any inconvenience to guests. QDS installed Aruba wireless across the entire facility including guest rooms, banquet halls, parking, pool and additional guest areas. Each AP was strategically deployed to extend wireless coverage to more than one room, reducing the number of APs and installation time to reduce overall cost. The Hotel utilized Aruba Mobility Controllers giving its IT team the ability to manage secure authentication, encryption, VPN connections, IPv4 and IPv6 services, and wireless intrusion protection for more than 32,000 mobile devices simultaneously.With Aruba's solution in place, Ezdan Hotels West Bay now has complete visibility and control of the network and devices on it from a single, easy-to-use interface. The Hotel's IT Team has also added comprehensive real-time monitoring capabilities to streamline troubleshooting and remediation by implementing Aruba AirWave Network Management. According to Aruba, AirWave allows the Hotel to 'identify and resolve problems in its wireless network before the issue results in helpdesk calls from guests'."Aruba's mobility solutions are centered around delivering enterprise-grade quality and performance in a cost-efficient package," said Samer Habbouch. "This huge project at Ezdan Hotels West Bay is further validation of our capabilities to meet #GenMobile mobility needs in the hospitality sector. The new Aruba infrastructure not only supports complimentary Wi-Fi for guests but can also be leveraged as a platform to generate new revenue streams through premium service offerings."Ezdan Hotels West Bay is a part of Ezdan Holding Group, which is featured among the world's leading organizations in Forbes Magazine's Global 2000 list. With the Hotel already reaping the benefits of Aruba's wireless network, plans are underway to replicate this success in other companies that are a part of the Group.About Aruba Networks, Inc.Aruba Networks is a leading provider of next-generation network access solutions for the mobile enterprise. The company designs and delivers Mobility-Defined Networks that empower IT departments and #GenMobile, a new generation of tech-savvy users who rely on their mobile devices for every aspect of work and personal communication. To create a mobility experience that #GenMobile and IT can rely upon, Aruba Mobility-Defined Networks™ automate infrastructure-wide performance optimization and trigger security actions that used to require manual IT intervention. The results are dramatically improved

productivity and lower operational costs.Listed on the NASDAQ and Russell 2000® Index, Aruba is based in Sunnyvale, California, and has operations throughout the Americas, Europe, Middle East, Africa and Asia Pacific regions. We have been awarded Microsoft Partner of Year for Customer Satisfaction for two consecutive years. Also we are an HP Platinum Part and have won HP and Microsoft Outstanding Frontline Partner for 2014 in Virtualization & Private Cloud. QDS has been appointed as ADR for Microsoft Windows Surface for Qatar Qatar Datamation Systems (QDS) says the key facts: global launch of the new Microsoft SurfacePro 2 tablet will enhance its ability to o■er end-to-end solutions in mobility and Bring Your Own Devices (BYOD) functionality to address the productivity crisis in Qatar business.QDS today announced it has been appointed in a limited group of Authorised Device Resellers (ADR) providing the newly launched Surface 2 and Surface Pro 2 tablets, which bridge the gap between consumer-style entertainment tablets and full-featured business laptops.The Surface 2 and Surface Pro 2 quickly change from a tablet to laptop thanks to a two-position built-in kick-stand, multiple ports and click-on keyboard.A new optional accessory Surface Dock allows more device connections, while a Power Cover/Keyboard supplies extra battery power.The inclusion of more processing power and up to 8 hours of standard battery life means that Surface Pro 2 can deliver the full potential of the updated Windows 8.1 operating system."Surface Pro 2 is the missing link which leverages the full vision of Windows 8 as a business productivity tool," said QDS's GM Mr. Mohammad Alam."The new Surface will meet employee requirements for greater mobility while also enabling creative work practices. This is a major step up from consumer targeted consumption devices."Mr. Mohammad Alam says Devices like the Surface deliver the human interface piece of the "Nexus of Forces" which Gartner Research has identi■ed as de■ning IT in the immediate future.Combined with the emergence of cloud computing and big data, demands for mobility and BYOD are rapidly changing the IT landscape."Providing employees with more ■exible IT solutions is vital to raising productivity,

retaining talented sta■ and gaining a competitive edge," said Mr. Alam."Bringing Surface Pro 2 and Surface 2 to the Qatar commercial channel greatly extends the reach of our devices-and-services strategy, delivering our family of devices enabled by cloud services to more organisations than ever before."Mohammad Alam says the trend toward employee mobility is growing as we transition from "time as an input" business models to "output" based models."Businesses need to accommodate employees who want a mobile device that enables them to manage their business and social context whilst on the go.""Enabling this while also keeping corporate systems and data secure unlocks greater productivity with the workforce and creates application development opportunities which can further enable mobile workforces."The social behaviour of the IT user is now a major consideration and Surface Pro 2 can accommodate those trends." QDS has won Special project award of Polycom award in an FVC Annual Gala Award ceremony QDS won the Advance Weather Forecasting Project of Civil Aviation Authority Met Office The Qatar Civil Aviation Authority / Qatar Meteorology Department (QCAA/QMD) upgrades its weather forecasting capabilities by initiating a major new project. In an open tender where ten consortia from Europe, USA and Korea participated and presented very interesting solutions, the evaluation declared the informatics company Qatar Datamation Systems (QDS), in collaboration with the Greek partnership of Innovative Technology Center S.A. (ITC) and University of Athens (UOA), as the winner.The experience of an institute like University of Athens and its capability to provide high-level training to the QMD employees weighted heavily towards the final choice, alongside QDS's reputation as a leading informatics company in Qatar and Gulf Region. The Greek partnership is well known for successfully carrying out similar projects in Greece, Europe, USA, as well as other parts of the world including the Arabian Peninsula and Gulf region. Over the past eight years, it steadily provides a series of sophisticated meteorological and environmental prediction tools for numerous applications in the Gulf region. These tools (models) are well-known for their efficient predictions of desert dust and associated phenomena and can accurately predict day-to-day and extreme weather events. The setup of such systems needs to take place in a supercomputing system that will be assembled by QDS and maintained by QMD.Well known forecasting tools like SKIRON/Dust and WRF will be installed and provide the regional forecasts. The high-resolution system RAMS/ICLAMS is expected to provide state-of-the-art predictions such as wind shear and fog for the new airport of Qatar, whereas wave and ocean forecasting systems (WAM and MICOM, respectively) will provide the necessary marine predictions. The forecasts will be available both to Qatar citizens as well as to the industry of the country. The new international airport of Doha and the flag carrier Qatar Airways, together with Qatar Gas and Qatar Petroleum that make up the heavy industry of the country, are expected to be substantially benefitted by the accurate weather and environmental predictions.The Director of QMD Mr Ahmed Abdulla declared to be very happy having this contract assigned to the specific consortium, because of the state-of-the-art forecasting tools implemented, the training activities and the transfer of expertise. According to him, this weather forecasting system is the first step towards a bigger activity related to marine and environmental forecasting, monitoring of the seismic activity and other major environmental issues of the region. Both Mr Abdulla and Professor Kallos stated that their target is to make QMD the leading institute in the Gulf Region, one that will coordinate meteorological and environmental predictions. It is worth mentioning that Qatar will host the Marine Center and related activities of World Meteorological Organization, under Regional Association II (Asia, Gulf Region, and Arabian Sea).Click here to read more from http://www.raya.com/news/pages/c407b248-726f-4f45-9c79-d45b3185b5c5 Qatar Datamation Systems is a 2013 Microsoft Partner Award Winner (Dated 1st October 2013)For the second year in a row, Qatar Datamation System, LLC. is proud to announce that they are the Microsoft Partner Award Winner for Excellence in Customer Satisfaction in Qatar. The company was chosen from a Qatar based field of top Microsoft partners delivering market-leading customer solutions built on Microsoft technology."On behalf of QDS, we are honored to be the winner of the Customer Satisfaction Excellence Award," stated Mohammad Alam, General Manager, QDS. "This award validates our total commitment and dedication as an organization to deliver successful solutions based on Microsoft Technologies implementations for our clients. Our clients' recognition and Microsoft's recognition of our accomplishments, hard work of our employees, and commitment to advancing our clients' IT infrastructure with proven Microsoft technologies confirms our strategic business plan is successful and

on course.""QDS's dedication to its clients and innovative Microsoft solutions has earned them the Customer Satisfaction Excellence Award two years in a row," said Mamoun Al-Bishtawi, SMS & P Lead, Microsoft Qatar. "QDS's client-focused deployment methodology has helped customers improve their infrastructure with a superior consulting experience. QDS does a phenomenal job in delivering world-class solutions that enhance and extend existing IT investments while producing valuable savings and improving productivity and processes."The Microsoft Partner Awards recognize Microsoft partners that have developed and delivered exceptional Microsoft-based solutions over the last year. Awards were presented in a number of categories, with winners chosen from a pool of almost 50 entrants from Qatar. QDS was recognized for delivering superior customer service based on an objective set of customer satisfaction surveys. State News Agency's New Private Cloud Leads to Optimum Computing Resource Use (Dated 23th July 2013)What happens with Qatar's largest news agency – Qatar News Agency – when there are simply too many servers to manage? Virtualization that's what! The move to virtualize wasn't all smooth however, the Agency faced storage constraints and used computing resources inefficiently. But, they overcame these hurdles to create a valuable network. This case study covers how Qatar News Agency tackeled these problems, read it here. Media Giant Gains Better Business Visibility and Control Using an ERP Solution (Dated 20th May 2013)Have you ever wondered what happens with existing IT infrastructure when media giants merge? This case study looks at exactly that. When QMC (Quatar Media Corporation) merged business entities, they inherited legacy systems that needed to be updated. Curious about how they went about this and the results? Click here to read the case study on how this worked. QDS became the first Microsoft Business Intelligence Gold Certified Partner of Qatar QDS has recently become the first Partner in Qatar to be a Gold Business Intelligence Partner. Being the only Gold BI Certified Company we are demonstrating our ability to deliver solutions that leverage familiar tools to provide insight to everyone in our customers' organizations —at a lower total cost of ownership."As the only Gold Business Intelligence Partner we feel it really differentiates us from the competition and establishes us as a market leader, further demonstrating our commitment with Microsoft and also to serve the customer's needs that are relying on Microsoft-based solutions," said Mr. Mohammad Alam, General Manager, QDS.Microsoft research shows that BI continues to be a top spending priority for chief information officers (CIOs). As a partner with the BI competency, QDS demonstrates how accurate BI can provide a competitive advantage to our customers. We are also in a better position to meet some of our customers' most pressing needs—and drive services revenue—by taking advantage of the technology investments our customers already have, to help them build more effective business strategies. Qatar Datamation System, LLC. Proudly announced it is a 2012 Microsoft Partner Award Winner (Dated 7th Feb 2012)Today, Qatar Datamation System, LLC. Proudly announced it is a 2012 Microsoft Partner Award Winner for Excellence in Customer Satisfaction in Qatar. The company was chosen from a Qatar based field of top Microsoft partners delivering market-leading customer solutions built on Microsoft technology."On behalf of QDS, we are honored to be the winner of the Customer Satisfaction Excellence Award," states Mohammad Alam, General Manager, QDS. "This award validates our total commitment and dedication as an organization to deliver successful solutions based on Microsoft Technologies implementations for our clients. Our clients' recognition and Microsoft's recognition of our accomplishments, hard work of our employees, and commitment to advancing our clients' IT infrastructure with proven Microsoft technologies confirms our strategic business plan is successful and on course.""QDS's dedication to its clients and innovative Microsoft solutions has earned them the Customer Satisfaction Excellence Award," said Mamoun Al-Bishtawi, SMS & P Lead, Microsoft Qatar. "QDS's client-focused deployment methodology has helped customers improve their infrastructure with a superior consulting experience. QDS does a phenomenal job in delivering world-class solutions that enhance and extend existing IT investments while producing valuable savings and improving productivity and processes."The Microsoft Partner Awards recognize Microsoft partners that have developed and delivered exceptional Microsoft-based solutions over the last year. Awards were presented in a number of categories, with winners chosen from a pool of almost 50 entrants from Qatar. QDS was recognized for delivering superior customer service based on an objective set of customer satisfaction surveys. QDS won the Service Partner of the Year (Runner's up) at the recent HP Services Partner (Dated 12th Sept 2011)QDS won the Service Partner of the Year (Runner's up) at the recent

HP Services Partner for the year 2011 Qatar Datamation Systems, one of Qatar's leading independent computer systems and services company have been awarded Service Partner of the Year (Runner's up) at the recent HP Services Partner of the year 2011 awards Middle east, held at Cape Town, South Africa.Winners at the awards ceremony were judged on the basis of a mix of key criteria over the past year including the percentage growth in sales of HP Services, the expertise of sales staff in selling HP Services as well as implementation of key marketing campaigns around the HP Services product range.These awards recognize HP solution partners that continue to demonstrate innovation and technology leadership, deliver impressive results, develop products that address both current and future customer needs and collaborate with HP to positively impact customers.Accepting the award on behalf of QDS, Mohammad Alam, GM commented, "Our goal is to be our customers' trusted IT advisor – providing them with IT solutions comprised of hardware, software and professional services. Migration for Azure Take your desktop to the cloud for remote work and unparalleled productivity Desktop Virtualization The Next Leap Forward in Enterprise Productivity Virtual Desktop platforms are transforming how teams work from anywhere in the world– an necessity in a post-pandemic world. Desktop virtualization is also a critical tool for maintaining business continuity. If disaster strikes, organizations can rest assure that their data remains secure and accessible at the cloud, allowing business operations to resume immediately.Enter Windows Virtual Desktop (WVD). WVD is a cloud-based application and desktop virtualization tool powered by Azure. Its baked-in security and compliance features, integration with the Microsoft suite of products enterprises have relied on for decades, and cost effectiveness makes it the best virtual desktop solution available. Desktop Virtualization Process We understand that every organization has different goals for their WVD investment. Our team of Azure experts and cloud consultants provide a cost optimization, security, and remote productivity strategy tailored to your specific needs. The path to desktop virtualization includes four key phases ASSESS Create a desktop virtualization plan informed by your application needs, current licenses, and infrastructure and TCO goals DEPLOY Set up a scalable & flexible virtualized environment tailored to your team's productivity goals and remote work requirements. ONBOARD Train employees on WVD best practices so that they can get the most out of their desktop virtualization investment. SECURE & MANAGE Leverage advanced adaptive threat protection tools to keep your virtualized infrastructure's data secure and stable. Make the journey from ON-PREM VDI TO WVD Virtual desktop infrastructure (VDI) is a key cog in the business continuity machinery, as it helps securely deliver desktops and applications to flexible workforces, regardless of their locations. By transitioning from on-premises VDI to Windows Virtual Desktop (WVD) in Azure, you can realize better ROI from your deployment while making your business continuity efforts more cost-effective, reliable, and futureproof. Simplified Productivity Given that employees are 20-25% more productive when working from home (WFH), and 76% of them prefer working remotely, virtual desktops will be critical for companies looking to get the most out of their workforce.WVD provides a level of freedom and workplace efficiency that would have otherwise been impossible, enabling companies to fully embrace post-2020 world of remote working. Windows Virtual Desktop integrates with Microsoft Teams and Microsoft 365 Apps for Enterprise, ensuring a seamless experience from any device, any location.When you work with a Partner like QDS, the productivity gains experienced through your WVD solution are amplified even further. We ensure your desktops are linked correctly, your applications provide a seamless experience, and your users are onboarded successfully. Cut Licensing and Infrastructure Costs WVD is a free service for anyone with an existing Windows user or Microsoft 365 license. The only additional costs are cloud consumption, for which you only pay for what you use.Windows Virtual Desktop also enables companies to maximize their current infrastructure and investments with VMware Horizon Cloud and Citrix Virtual Apps and Desktop Service on Microsoft Azure. WVD integrates into both of these existing applications and desktop virtualization environments for those looking to maintain a hybrid cloud deployment. In addition, VMware and Citrix customers can deploy Windows 10 Enterprise multi-session on Azure VMs, enabling multiple concurrent usersAt QDS, we have every trick and tactic at our disposal for optimizing your WVD and Azure costs. From Azure Hybrid Cloud Benefits and price matching to reserved instances and containerization, our team of Azure Cloud experts will ensure you get as much value as possible from your Windows Virtual Desktop investment. Automatic Security With Windows Virtual Desktop, concerns over ransomware, malware, and cyber-attacks are greatly reduced. This is because WVD creates an extra security layer that exists in Azure and does not rely on the device the employee is using – or how secure that device is.WVD is hosted in not just any cloud – it resides in Microsoft Azure, the leading cloud provider for enterprise

security which gives access to a suite of comprehensive, easyto-use tools for maintaining your security posture. Azure Active Directory Conditional Access to manage risks and apply the right access controls to users and devices Azure Firewall and Azure Sentinel to keep virtual desktops secure and reduce vulnerabilities with end-to-end security Multi-factor authentication and role-based access control (RBAC) for secure login and easy threat detection using Azure Security Cent Managing security in the cloud and adhering to Azure security best practices takes a particular skill set that many companies lack. For this reason, Partners like QDS can help you bridge the knowledge gap. Our experts understand every facet of Microsoft's vast security toolset and will ensure your team knows how to leverage it to ensure end-to-end security for your virtual desktop implementation. Qatar Datamation System's Rapid Deployment WVD Solution includes all of the standard Microsoft Windows Virtual Desktop features, plus: Supports up to 500 WVD users (Deployed in units of 25) 1 WVD collection with 3 Applications included (Inquire about additional apps) Creation and support of the WVD collection 1 instance of Azure AD Domain Services to act as a domain controller Up to 5 Organizational Units will be configured to group users by organizational role to support Role Based Access Controls (RBAC) 1 Azure Storage Account configured for Azure Files Up to 5 File Shares will be configured and up to 500 user prole shares will be configured A total of 1TB of data is included 1 Session Host VM (per 25 users) configured for pooled sessions (available as Windows 10 desktop sessions only) Requirements (Additional services available for custom solutions) Microsoft M365 licenses included, let us know if you have your own Authentication to existing domains can be added, but may increase deployment timing All backups will occur at 12AM Central Time Legacy OS versions (Windows 7 or older) are not supported Custom patching schedules are supported, can be added post WVD launch We support the WVD environment, you support your applications Built-in Microsoft WVD compliance and security features are standard. Compliance and Security offerings are available Qatar Datamation System Rapid Deployment WVD solution includes: Out-of-Box Configuration Simplified migration and management experience on Azure Azure Domain Controller File Server WVD Tenant Infrastructure Server Management Domain VPN Management Network Policies On-Boarding Tools Users AD User Management Simplified Group & Identity Management Office 365 User Management Group Management Shared Mailbox Management WVD Pooled Desktops Security 2FA for Admin Portal Login Content and Threat Filtering File Server Identity, Data, and Networking Protection Backup & DR Backup Management Azure Storage Account Azure File Shares Qatar Datamation System WVD Solution Cost Estimator Delivered by Qatar Datamation System, an Azure Expert Partner Unified WVD Management Via Azure Portal User Density, VM Sizing, Scaling Policies Success Stories Ministry of Culture and Sport Azure Ready Assessment Interviews WVD Deployment scenario discussion Discovery of current infrastructur Planning Azure WVD Design Discussion Cloud Security Discussion Design Documents Azure Infrastructure Readiness for WVD based on MOTC Approved design WVD session host deployment using custom images Profile management using FSLogix Dedicated host pools for each department 87 virtual machines deployment Secure access using Azure MFA Patch management using Azure Update services Automatic shutdown/start of VMs using Azure automation Workplace monitoring and security using Azure Monitor and Security Center General Authority Of Customs Azure Ready Assessment Requirement for Flexible and Specialized Workloads. WVD Deployment scenario with customizations Discovery of current infrastructure and provide best solution. Planning Azure WVD Design Discussion Enhanced Security with Simplified Configuration Superior Economics from Significant Cost Savings Simplified Management Azure Infrastructure Readiness to mitigate COVID situation work from home approach Flexible user experience through a single host pool, with multiple app groups WVD independent session host deployment using custom images Profile management using FSLogix 30+ virtual machines deployment to meet the requirement Secure access using Azure RBAC, MFA & CA. Simplified and effective troubleshooting using advanced diagnostic service Automatic shutdown/start of VMs using Azure automation One service supports both Desktop & RemoteApp experience Al-Rayyan TV Azure Ready Assessment Provides virtualization infrastructure as a managed service Utilizes Azure Active Directory identity management service Simply connect to on-premise resources Lower labor cost because compute and storage move to cloud Planning Azure WVD Design Discussion Enhanced Security with Simplified Configuration Manage WVD VM's using existing tools like Configuration Manager Modernized workloads for simplified deployment Uniform

deployment via serverless architecture 3Host Pools as per Different Department requirement Azure BLOB Storage usage for custom images to be stored Profile management using FSLogix Isolated user sessions in both single and multi-session environments Sophisticated security services easily configured through Azure RBAC, MFA & CA Simplified and effective troubleshooting using advanced diagnostic service Reverse connect technology used to eliminates the need to open inbound ports to the VMs Leave the IT to us and focus on your business We remove the headaches from IT so you can focus on what matters most. To achieve that, you

need the right set of technologies tailored to support your specific needs and budget. And that's where Qatar Datamation Systems can help.Our skilled, business-savvy technicians will learn your business and help you make the right software choices. With expert implementation and ongoing management, your business applications will continue to improve your workflow, productivity, and quality of service, guaranteeing maximum ROI as you scale for growth. Our Business Applications lead to better business results through: Enhanced operational efficiency Your customized solutions allow you to automate mundane tasks and streamline work processes, so your teams can deliver better work faster Resources savings We partner with leading vendors to deliver the best solutions at the best prices while also keeping everything at peak performance to save you from costly downtime and maintenance fees Peace of mind The QDS teams will be there for any of your questions or problems day and night, so you can work with confidence and focus on growth Our comprehensive line of premium, cost-effective Business Applications include: Workflow and productivity Office 365 Office 365 is a cloud-hosted suite of productivity tools to improve your collaboration and communication. In addition to the efficiency-boosting tools you might already be using every day, Office 365 suite also includes: Skype for Business – an enterprise-ready unified communications platform that lets your teams stay connected no matter where they are, on any device via secure instant messaging, voice call, and web meetings Exchange – a communication platform that lets you easily and securely manage your messages, calendar, and contacts Teams – a user-friendly collaboration platform that offers office chat, video conferencing, and file storage, and integrates seamlessly with other productivity tools Microsoft Phone System – a feature-rich, cloud-based telephony that improves your business communication via instant messaging, voice call, web conference, and more while also cutting costs OneDrive – a secure cloud storage that lets your employees easily and securely access, archive, and collaborate on business files no matter where they are without compromising on data security ERP Implementation services Enterprise resource planning (ERP) is a practice of managing a company's main business processes to automate workflow and improve efficiency, using software. Whether your ERP project requires a complete systems overhaul or a quick reconfiguration on an existing tool, QDS will help align your people, process, and long-term goals through a tailored strategy. DocuSign DocuSign is an e-signature solution that lets you sign legitimate, electronic signatures on contracts and other business documents. Its efficient, easy-to-use functionalities improve workflow, save time, and reduce paper waste and costs. Employee Self-Service An easy-to-use CRM platform, Employee Self-Service offers live chat, ticketing, portal, and social media connections. It allows you to enhance customer experience by creating a support center with your personalized FAQs, and a self-service repository of files and documents that your clients can easily access. Microsoft Project Microsoft Project is an efficient, user-friendly project management tool that lets you accurately keep track of progress, timelines, and costs. Accessible from any internet-connected device, Microsoft Project allows your authorized team members to easily and securely access data, plan, assign tasks, and create easy-to-understand project reports. Nintex Nintex is a user-friendly workflow improvement and process automation platform. With its intuitive drag-and-drop feature, this cutting-edge tool makes it easy for you to streamline tasks, create business documents, and track business processes across your entire organization. Windows 10 A globally trusted operating system, Windows 10 promises improved speed, efficiency, and flexibility. It offers a customizable desktop that lets your employees manage their own workspace and comes with robust security tools to keep your business secure against emerging threats. Cortana Part of Windows 10, Cortana is a virtual assistant tool that understands voice command, keeps tracks of your interests, and works with certain smart home devices, guaranteeing next-level experiences. Network and security Windows Server The latest version of Windows Server enables secure, efficient virtualization of your data and systems. Easy to set up and manage, Windows Server lets you enjoy improved efficiency, agility, and security, while also saving money. Enterprise Mobility Suite The Enterprise Mobility Suite from Microsoft allows effective, hassle-free monitoring and management of business devices. The suite comprises enterprise-grade security solutions, including: Mobile Device and Application Management Hybrid Identity and Access Management Data Protection and Access Control ExpressRoute Microsoft Azure ExpressRoute lets you create private connections between your on-premises networks and cloud-based datacenters. Thanks to its high throughput, multilayered protection, and built-in redundancy, ExpressRoute guarantees secure, reliable data transfer, backup, or

recovery. Advanced Threat Analytics (ATA) Part of the Enterprise Mobility Suite, Advanced Threat Analytics learns your network behaviors, monitors all your business login traffic to flag anomalies, and provides a detailed attack timeline and an effective recovery plan if a threat is detected. Microsoft Identity Manager Microsoft Identity Manager lets you ensure each of your users has appropriate access to business information, using role-based identities and robust authentication solutions. Application development Xamarin An intuitive, cost-effective application-building platform, Xamarin uses a single framework and allows you to share code between Android and iOS. The solutions consist of two components: the internal core functionality and the UI display, which can be developed for each platform, allowing optimal flexibility. Visual Studio With over 1,000 extensions and resources, Visual Studio is the ideal platform for your teams to collaborate, create, and deliver applications for the Web, Windows, Android, and iOS. It supports multiple coding languages including C++, JavaScript, Python, and more and also integrates seamlessly with Xamarin. Visual Studio also comes with effective debugging tools that quickly diagnose issues and run performance testing to ensure your application can handle real-world traffic. Device management System Center System Center is a suite of end-to-end management tools that allow you to keep your physical and virtual infrastructure efficient and secure against emerging cyberthreats. Operations Management Suite Part of System Center, the Operations Management Suite lets you manage and protect your on-prem or cloud infrastructure with monitoring, configuration, automation, and protection capabilities. Enterprise Mobility Suite The Enterprise Mobility Suite lets you ensure maximum cybersecurity across business apps, systems, and devices, no matter where your teams are accessing them from. The suite comprises mobile device and application management, hybrid identity, data protection, and access control. Intune Intune offers easy endpoint management with granular access control to business data on personal or company-owned devices. It helps you enable a secure mobile workforce and save on operational costs, thanks to a low monthly fee per user. Data SQL Server SQL Server is an intuitive platform that lets you easily build mission-critical applications and get faster insights into all your data. Coming with in-memory technology, analytics, and robust backup and disaster recovery tools, SQL promises improved data security, workflow, and bottom line. Power BI Power BI is a data analytics tool with an easy-to-use dashboard that gives you full visibility over databases, creates efficient reports, and reaps actionable insight from different data sets. It works with SQL Server and your existing systems while also giving you access to over 50 intuitive business apps. Cloud Computing Azure Microsoft Azure is a fully stacked, highly customizable cloud-computing platform that increases your efficiency, data security, and agility with cutting-edge features that include: Cloud management portal – a user-friendly dashboard that transforms data into actionable insights and monitors your usage of virtual machines (VMs) Dynamic tools and virtual machines – Azure lets you access a range of intuitive tools that will streamline your operations and support your specific needs Active Directory – comprehensive identity and access management tools that ensure easy, secure access to applications, using cybersecurity best practices such as multifactor authentication, device registration, role-based access control, and more IoT suite – predictive intelligence and more intuitive solutions that integrate seamlessly with your existing systems and devices to help you streamline processes and turn various sets of data into actionable insight Site recovery – a scalable, cost-effective, backup and recovery solution with automatic data replication, secure, robust storage, and proactive monitoring Hyper-V A trusted virtualization platform, Hyper-V improves your efficiency, data security, and agility while also lowering costs. It allows easy, efficient management through a single console. Without it, you face more and more security risks of greater severity as your data increases in volume and complexity. The potential damages can range from paralyzed operations to eroded client trust to the closure of your business.Save your organization from such scenarios by partnering with QDS for our comprehensive range of data and backup solutions. Our seasoned experts will analyze your goals, current and future data storage needs, and network environment. We'll then provide swift implementation and ongoing management to keep your data available, secure, and easily accessible so you can grow toward success more efficiently. Our Enterprise Computing covers: Disk Arrays and Virtualization Disk array is a storage system that contains multiple drives with advanced functionalities and is managed by a central management system. This means you'll be able to manage your data easier, cut costs, and reduce downtime. Disk arrays work with both physical and virtual server environments. Backup and Replication Systems Our backup solutions include virtual tape, Network Attached Storage (NAS), data deduplication, and replication. These best practices will maintain your data consistency, enable faster and more effective backup and recovery times, and help you save on operational costs. With swift, professional service from QDS teams, you'll have the required bandwidth and capabilities, and the right solutions integrated into both your offices and company data centers. Data Archiving QDS utilizes industry-leading, scalable archiving and storage solutions to ensure easy and secure access to vast data volumes. After a smooth integration with your existing infrastructure, you'll enjoy improved data availability, increased protection, reliable backups, and practical insights from our business intelligence, as well as massive cost savings. Enterprise Servers QDS provides a complete range of efficiency-boosting, cost-cutting solutions that includes: Turnkey solutions that improve availability, efficiency, and data security High-performance, easily scalable server environments that can handle over 1,000 users Multi-vendor operating systems (HP-UX, Microsoft Windows, and Linux) Server consolidation and optimization Disaster recovery and business continuity solutions Blade infrastructure Our Enterprise Computing service helps organizations work smarter with: Increased efficiency Our proven, customized IT solutions support your specific needs and result in improved productivity and performance Increased efficiency Our proven, customized IT solutions support your specific needs and result in improved productivity and performance Resources savings Your teams will be able to automate mundane tasks and focus on growth-generating activities, preserving resources and saving you money Resources savings Your teams will be able to automate mundane tasks and focus on growth-generating activities, preserving resources and saving you money Peace of mind The QDS teams will be there for you day or night so you can work with confidence and focus on growth Peace of mind The QDS teams will be there for you day or night so you can work with confidence and focus on growth Grow with confidence knowing we'll equip your business with only the best IT solutions Leave the IT to us and focus on your business We remove the headaches from IT so you can focus on what matters most. This means having the right IT solutions at a price that doesn't break the bank will determine the survival of your business.To help you deliver fast, efficient services while keeping your costs low, Qatar Datamation Systems offers a comprehensive range of IT solutions that integrate, consolidate, and simplify operations across your entire IT infrastructure. Regardless of the complexity of your needs, our seasoned technicians have you covered. Our Enterprise Solutions lead to better business results through: Enhanced operational efficiency Our customized solutions and proper integration ensure your teams can work smarter and deliver better services in less time Resources savings We'll help you automate mundane tasks and streamline operations with premium IT solutions at SMB-friendly pricing Peace of mind The QDS teams will keep all your solutions running at peak performance 24/7/365 so you can work in confidence and focus on growth Our comprehensive range of efficiency-boosting, cost-cutting IT solutions include: Operations and Automation Our solutions will consolidate IT event management activities into a single dashboard with over 200 intuitive tools. After a smooth integration with your existing systems, you'll enjoy end-to-end visibility over your IT environment, your IT staff will troubleshoot and fix problems faster, and your teams will have more time and energy to contribute to growth. Our Operations and Automation solutions also let you: Activate domain-specific agents in on-premises, private, and public cloud environments Keep any cloud, XaaS, or on-premises service optimized and secure Drive automated AIOps with machine learning derived from more than 50 patents Leverage anomaly detection and predictive analytics Fix IT issues fast with chatbots, proven ITSM tools, and over 8,000 runbooks Gain interactive and historical analysis of hundreds of metrics from our extensive KPI library Enterprise Service and Asset Management Enterprise Asset Management is more than tracking assets. It also means lifetime maintenance to ensure your assets continue to earn maximum ROI. But this continuous, demanding task will likely tear your teams away from more important work, and that's where QDS can help. By letting our experts keep your IT assets in prime condition, you'll: Avoid costly downtime Easily stay compliant with changing regulatory compliance Keep your operational costs low, thanks to zero unnecessary repair fees or hasty purchasing decisions Enterprise Cloud Our range of cloud solutions offer different levels of flexibility to meet your specific needs, long-term goals, and budget. No matter the complexity of your IT environment, QDS will craft a strategic plan and ensure a secure, smooth cloud migration so you can enjoy all the benefits with zero headaches. Unified Endpoint Management and Patch Management Data security is becoming one of the top defining factors for today's business success. With cybercriminals getting more advanced by the minute, you need automatic, intelligent solutions to keep up with emerging threats — and that's exactly what QDS can help you achieve. Our patch management solution allows you to achieve the following via a single user-friendly console Stay compliant to ever-changing regulations Quickly identify and address the vulnerabilities in your systems Automate real-time updates and patches across all devices Increase productivity with identity-based management that focuses on users and their needs, not just devices And much more PaaS Paas, or Platform-as-a-Service, is a cloud computing solution that lets businesses develop, run, and manage systems without the hassles of infrastructure maintenance. PaaS from QDS allows you to: Optimize efficiency and application deployments Improve security Automate mundane tasks and free up your IT staff Enjoy seamless integration with your existing cloud or bare-metal servers Empower your users with a self-service portal and on-demand resources Cut operational costs Information Analytics In the data-driven business world, you need thorough

understanding of the market to succeed. QDS is committed to helping you achieve that through a combination of statistical analysis and data mining techniques. The ample benefits of Information Analytics from QDS include: Actionable insights on market trends and target audience behaviors Faster, more informed decision-making User-friendly data dashboard that lets you gain real-time visibility over your operations on any device Media Management Whether you are a news agency, governmental institution, or a royal court, our Media Management solutions will help you monitor, analyze, and archive content efficiently. With QDS's Media Management, you can: Automatically capture audio and video files from different sources such as satellite channels, and then edit and deliver them to your desired destinations Monitor your social media accounts to stay ahead of market trends Transform your big data into actionable decisions Manage your content subscribers on an easy-to-use, feature-rich platform Threat Simulation Platform With cyeberattacks constantly outsmarting protection schemes, the only way to ensure your business is safe is to test your own defenses before hackers can. QDS helps you do that by usingThreat Simulator, a breach and attack simulation (BAS) platform for network security testing. In addition to identifying your vulnerabilities, we'll also recommend effective remediation and the latest cybersecurity best practices to keep your entire organization safe from emerging threats. Application Security Application Security is a combination of processes, tools, and best practices to keep business applications safe from cyberthreats throughout their entire life cycle. This helps organizations avoid costly data breaches and other kinds of malicious attacks.QDS provides Micro Focus Application Security solutions, with security testing and management available both on-premises and as-a-service. Our Application Security offers a bundle of proven solutions that include: Fortify Static Code Analyzer – static application security testing (SAST) that pinpoints vulnerabilities early in the software development life cycle Fortify WebInspect – dynamic application security testing (DAST) to simulate real-world security attacks on a running application Interactive application security testing (IAST) – a combination of our dynamic testing and runtime analysis Fortify Application Defender – runtime application self-protection (RASP) that proactively monitors and detects both known and unknown threats Fortify on Demand – a simple and quick way to accurately test applications without having to install or manage software or add additional resources Mobile Security – a testing methodology that assesses endpoints, networks, and servers Software Security Assurance – a centralized management repository that provides visibility on your security performance Fortify Software Security Center – a centralized management repository that manages and tracks your security testing activities, giving you a bird's-eye view of your protection performance SIEM Security information and event management (SIEM) is a software solution that aggregates and analyzes activity from many different resources across your entire IT infrastructure.It then analyzes data to discover trends and detect threats. QDS offers Elastic SIEM that lets you: Easily manage and analyze diverse sets of data across your IT environment Effectively block cyberattacks with prebuilt anomaly detection Respond to threats fast with a powerful investigation UI and embedded case management DevOps Combining development (Dev) and operations (Ops), DevOps streamlines your operations and allows you to deliver better software faster. With proper integration by QDS, DevOps will help you: Improve coordination between different phases of development Build and test your applications faster and more effectively Respond more effectively to customer needs, and achieve your business goals faster DevSecOps DevSecOps is an extension of DevOps and is sometimes referred to as Secure DevOps. It carries out security testing earlier in the software development life cycle (SDLC), rather than at the end when vulnerability mitigation is more difficult and costly to implement. With expert planning and ongoing management by QDS, your DevSecOps will let you: Ensure security throughout application development and deployment Help your developers make the most out of DevSecOps with Secure Code Warrior integration and Micro Focus training Automate tasks throughout Continuous Integration and Continuous Delivery (CI/CD) pipelines SAST with Fortify Static Code Analyzer Optimize dynamic application security testing (DAST), runtime application and self-protection (RASP), software composition analysis (SCA), and open source security (OSS) Robotic Process Automation Our innovative, secure, and easy-to-use software robots mimic screen-based human actions to boost your productivity, accuracy, and cost-effectiveness. With QDS's Robotic Process Automation, you can: Track activities in detailed logs, in real time Automate processes without exposing sensitive data, by using unique IDs and role-based credentials Save time and cut costs Free up your teams so they can

keep your entire IT infrastructure optimized and safe from emerging cyberthreats Run your business on a high-performance, secure network and achieve success more efficiently In today's digital era, businesses demand IT to be more robust, secure and yet cost-effective. To achieve operational productivity along with compliance, strategic network architecture and efficacious security solutions are required. QDS Network & Security division ensures you get these services and solutions without any hassles or worries. Our highly skilled and experienced team will assess your business needs, existing network architecture and security posture. We'll then implement solutions that not only cover your entire threat landscape but also strengthen your entire IT infrastructure. Our goal is to protect your data, people and reputation while you work toward success. Our network and security solutions lead to better business outcomes through: Enhanced operational efficiency A secure, optimized network means you'll enjoy improved uptime, work quality, and profitability Resources savings Our robust cybersecurity tools address potential threats before they can cause debilitating, expensive damage to your operations Peace of mind The QDS teams will proactively monitor your IT day and night, keeping you safe from emerging threats so you can focus on growth Best-in-Class network solutions and services tailored to your business needs and goals From strategic planning to implementation and support, we make sure your network provides required productivity through innovation. On-Premises Networks Efficient, secure and automated physical network solutions at your own workplace or strategic location. On-Premises Networks Efficient, secure and automated physical network solutions at your own workplace or strategic location. Cloud Managed Networks Wired and wireless network architecture that allows remote management and total visibility over your networks while also improving speed and security. Cloud Managed Networks Wired and wireless network architecture that allows remote management and total visibility over your networks while also improving speed and security. Hybrid Networks A combination of on-premise and cloud network solutions tailor-made for your organization that promise scalability, capacity, and performance. Hybrid Networks A combination of on-premise and cloud network solutions tailor-made for your organization that promise scalability, capacity, and performance. Manage your network more efficiently and effectively with our tools, including: Software Defined Data Center a virtualized, automated data center that accelerates IT service delivery Software Defined Access Network a proven, hassle-free network management solution that uses a central control system to increase agility, efficiency and security Application Delivery Control a load balancer that improves your application performance and availability while also allowing easy scalability Active-Active Data Center multiple data centers that guarantee maximum application availability and traffic load sharing Network Visibility and Assurance a tool that provides complete visibility into your network's performance Essential Network Services intuitive technologies that ensure smooth, secure communication, easy management, as well as monitoring and troubleshooting of IP addresses across your network We take your cybersecurity seriously, keeping you protected across all attack vectors Strategic cyberdefenses and end-to-end threat management, in line with leading frameworks, to protect your digital assets and keep you complian Infrastructure and Network Security Next-Gen Firewalls – prevention-based architectures that detect and block threats in real time and evolve with your business Network Visibility/Access Control – proven security solutions that keep your business safe from suspicious or unauthorized access Secure Web Gateway – URL filtering and application controls to minimize the risks of online attacks DNSSEC – protocols and specifications that strengthen the security of your domain name system DDoS Solution – patented firewalls and security tools to protect your business against a distributed denial-of-service attack, which is a malicious attempt to make a network unavailable by overwhelming it with false traffic Application Security Web Application Firewalls – advanced protection that monitors, filters, and blocks a variety of malicious online attacks Application Delivery & Control – a single point of control that handles load balancing between servers, allowing for faster application delivery Web API Security – a robust cybersecurity tool that detects and remediates online attacks on your website Email Security Secure Email Gateway – a gateway that protects your email environment against online threats such as malware, ransomware, and phishing Email Anti-Spoofing (DMARC) – Domain-based Message Authentication, Reporting & Conformance to assure your clients and business partners that emails sent out from your organization are secure Phishing Simulation Solution – test your employees' awareness so they are better protected against social engineering attacks Endpoint Security Endpoint Protection Platform (EPP) – effective, up-to-date

solutions to protect all your devices against zero-day attacks, data breaches, and other malicious attacks Endpoint Detection & Response (EDR) – an integrated, advanced threat detection tool that provides real-time protection for all your endpoints Endpoint Encryption – robust prevention of unauthorized access and malicious attacks on all your devices/li> Mobile Device Management – easy, efficient solutions for your IT administrators to control, secure, and enforce policies on smartphones, tablets, and other endpoints Security Monitoring and Operations User and Entity Behavior Analytics (UEBA) – an intuitive intelligence tool that proactively monitors activity and effectively detects and responds to any anomaly Security Information and Event Management (SIEM) – data aggregation and analytics tools that detect and respond to abnormal behavior before damage can be done to your systems Security Orchestration Automation and Response (SOAR) – a clear-cut, effective process that includes vulnerability management, incident response, and security operations automation Data Privacy Data Classification – an efficiency-boosting process of organizing data into categories, making it easy to access, archive, retrieve, and store for future useData Loss Prevention – a bundle of effective security solutions to keep your entire database safe against emerging threatsData Encryption – a proven solution to keep your business data, reputation, and industry compliance intactDatabase Security – all-round protection for your database and applications that access it User Access Control Identity & Access Management – an intuitive tool that lets you manage identities, roles, and authorizations to minimize security risksSingle Sign-On – an easy access management tool that lets users securely connect to systems and sites with just one set of credentialsTwo-Factor Authentication – a two-step security verification process to better protect both the user credentials and the resources they can access VAPT Vulnerability Assessment and Management – detailed analyses of your network's environment that uncover potential threats and recommend remediation plans Penetration Testing – a simulated cyberattack against your systems to ensure zero vulnerabilities Two-Factor Authentication – a two-step security verification process to better protect both the user credentials and the resources they can access Change & Patch Management Privileged Access Management – cutting-edge solutions to securely manage and monitor critical assets in your Active Directory environmentPatch Management – thorough scanning of all your devices for missing software updates, followed by effective patches to help you keep up with advanced threats Security Services Security Awareness Solution – a knowledge hub with up-to-date, easy-to-understand best practices to help your teams stay safe against advanced threats Security Posture Assessment – a thorough assessment of your company's cybersecurity schemes and improvement plans from certified specialists Rest easy knowing you've teamed up with the best in cybersecurity Leave the IT to us and focus on your business We remove the headaches from IT so you can focus on what matters most.
