News Microsoft Partner of the Year 2023 With tremendous pride we announce that Qatar Datamation Systems has been awarded "Microsoft Partner of the Year 2023" in Qatar. QDS is a leading Microsoft partner renowned for its expertise in providing end-to-end cloud solutions, facilitating digital transformation, and driving business growth. With a deep understanding of the power of the cloud, QDS continues to enable organizations to harness innovative technologies and unlock new opportunities for success. Our commitment to delivering success along with our vigorous partnership with Microsoft we continue to endeavor untread paths, redefining success. Modernization of Web Applications on Microsoft QDS has earned the Public Cloud Partner of the Year Award 2020 As we work towards our strategic vision to be the best provider of IT Services and solutions in Qatar, we proudly announce being a winner of Fortinet Public Cloud Partner of the Year Award 2020! In QDS we truly believe that together with our esteemed partners can make a positive contribution to IT market and Qatar market in particular, Appolinaire Morino, Regional Sales Manager- Public Cloud Middle East/Fortinet declared:" one partner in particular that gain the skills to be able to install and support public cloud, with the minimal support of Fortinet. The result was highly strategic won, therefor as a recognition of the achievement, it is a great pleasure to recognize QDS as Public Cloud Partner of the year 2020." QDS has earned the Public Cloud Partner of the Year Award 2020 Qatar-(date) -Qatar Datamation Systems has been Qatar's leading IT service provider serving businesses throughout the country for more than three decades. Today Qatar Datamation Systems (QDS) proudly announced it has earned the Windows Server and SQL Server Migration to Microsoft Azure advanced specialization, a validation of a solution partner's deep knowledge, extensive experience and expertise in migrating Windows Server and SQL Server-based workloads to Azure.Only partners that meet stringent criteria around customer success and staff skilling, as well as pass a third-party audit of their migration practices, are able to earn the Windows Server and SQL Server Migration to Azure advanced specialization.As companies look to modernize their applications and take full advantage of the benefits that cloud computing can deliver, and with the recent end-of-support for Windows Server 2008 R2 and SQL Server 2008 R2, they are looking for a partner with advanced skills to assess, plan, and migrate their existing workloads to the cloud. "We are committed to delivering highly effective business outcomes and results to our clients, Earning an advanced specialization from Microsoft provides another level of expertise to our comprehensive list of services that will enable us to help our clients capitalize on using cloud-based modern technology to drive digital transformation." Muhammad Ali Khan – Manager Business Applications. Gavriella Schuster, Corporate Vice President, One Commercial Partner (OCP) at Microsoft Corp. added, "The Windows Server and SQL Server Migration to Microsoft Azure advanced specialization highlights the partners who can be viewed as most capable when it comes to migrating Windows-based workloads over to Azure. Qatar Datamation Systems (QDS) clearly demonstrated that they have both the skills and the experience to offer clients a path to successful migration so that they can start enjoying the benefits of being in the cloud." Microsoft Azure Marketplace About Qatar Datamation systems (QDS) QDS provides the solutions to its customers' IT problems. Qatar Blockchain Summit 2018 Connecting Global Business Leaders &

Government Visionaries Qatar Datamation Systems would like to thank its customers for making the first ever Blockchain event in Qatar a roaring success.Qatar Blockchain Summit 2018, held at the Kempinski in Doha on the 20th of November, provided a gateway to the latest innovative thinking and applications in Blockchain, and an inspirational meeting ground for top technology practitioners and industry experts from all sectors such as Government, Telco, Banking, and Finance as well as regulators from the Blockchain ecosystem.The aim of the event was to establish a collective vision on Qatar's Blockchain adoption journey, after looking at real life and production grade implementation examples of Blockchain based platforms in the Digital Government and Transformation as well as in Financial Regulation and Supervision space. The Blockchain Summit showcased the most cutting-edge and forward-thinking trends, technology, and use cases within the Blockchain space. The event attracted a lot of interest and excitement from customers and partners to establish a think-tank that creates an industry wide vision for the adoption of Blockchain technology.Again, we thank you for your interest and participation in the Qatar Blockchain Summit 2018 and we very much look forward to working with you in transforming the industry.QDS would also like to thank our Partners Microsoft and Avanza Innovations for sharing their knowledge and successes in the Blockchain space and for making this event a success. QITCOM News Doha, Qatar — March 12th, 2017 — Qatar Datamation Systems participated in QITCOM 2017, which is Qatar's biggest digital event. It is the fourth edition of Qatar's information and communication technology exhibition and conference.This event was held within the span of three days from the 6th to the 8th of March at the Qatar National Convention Center, bringing together both international and local experts, specialists, key government decision makers, innovators, and entrepreneurs in the field of Information Technology.Qatar Datamation Systems, as a Microsoft Gold Partner, was stationed within the Microsoft Booth, which gave the QDS Team many opportunities to share ideas and connect with fellow partners.This event also paved a way for the QDS Team to interact with new clients who were interested in what the company had to offer, as well as strengthen ties with clients who were already associated with Qatar Datamation Systems and its partners.Qatar Datamation Systems is very honored to become exhibitors at such global events and the team looks forward to attending future exhibitions that can help local companies such as QDS to globalize and share their solutions.Qatar Datamation SystemsFor additional information:203 GRIDCO III C RING RoadDoha, Ad Doha 13856Phone: +974 44439900Fax: +974 44432154 Moving Milaha to Cloud QDS has successfully moved Milaha operations to cloud with Office 365, SharePoint 2016, etc.Qatar Navigation, also known as Milaha, is one of the biggest maritime logistics, oil, gas, and transportation companies in the Gulf region, which meant it was sometimes difficult to manage all of their data. With the help of QDS, the Milaha IT Team established Azure's trustworthiness and security around clients accessing Milaha applications via a web-based access panel. An important component within this was extensive penetration testing by a security expert, who concluded that the service was secure. QDS also helped launch Office 365 for Milaha so that it provided fast performance, and 24/7 support. QDS believes that Azure is the foundation for looking forward into the future, enabling companies to optimize the IT costs and normal expenditures, while creating space and cost savings for innovation that may lead to further improved cost efficiency in the long term.Microsoft Case Study:https ://customers.microsoft.com/en-us/story/milaha-logistics-office365-azure-cloud-services-sharepoint-serv er-2016-en Qatar Datamation Systems recognized as 2016 Microsoft Country Partner of the Year for Qatar 2nd Year in a Row Doha, Qatar — May 31st, 2016 — Qatar Datamation Systems today proudly announced it has won the 2016 Microsoft Country Partner of the Year Award for Qatar for 2nd Year in a Row. The company was honored among a global field of top Microsoft partners for demonstrating excellence in innovation and implementation of customer solutions based on Microsoft technology."Winning The Microsoft Partner of the Year 2016 Award twice in a row is the greatest acknowledgement of our efforts to align our growth strategy with the Microsoft Devices, Cloud, Productivity, and Business Processes ideologies. A gaint media House migration QDS has done the Biggest Migration of an On Premises Datacenter to Microsoft AzureQDS has accomplished one of the biggest On-Premises Datacenter migration to Microsoft Azure Cloud. A video case study has been published on Microsoft site. The project required a lot of deliberating and strategic planning. QDS placed its highly skilled and experienced workforce to deliver all of the requirements of the customers. The project was comprised a lot of things like to migrate the whole infrastructure, business applications that are not limited to ERP, CRM, SharePoint, and custom developed application. QDS also took advantage of Microsoft SAAS offerings to host email servers, Microsoft projects, CRM and On Office 365. QDS always has demonstrated its innovative abilities and successfully raised the bar in technology and related services which can be comprehended through customer's gratification and satisfaction.Microsoft Video Case Study:https://customers.microsoft.com/Pages/CustomerStory.aspx?recid=22519 QDS has been appointed to deliver DataCetner development and Migration project for one of the biggest tv channel in Qatar QDS recognized as a trusted partner for providing services and solutions to one of the largest TV Channel of QatarDespite of aggressive local competition, QDS has been selected with the opportunity to work with one of the biggest media house. QDS was accountable for building a whole new data center for this very global network of the channels. The project started with building a new data center

which included Servers, Storage, Network Infrastructure, Security Solutions, ITSM solutions, and Private cloud Implementation based on Microsoft Solutions. QDS is also providing with the services of migrating 2500 users to the new date center, migration of Applications, ERP, Collaboration Platform, ITSM Solution, Etc. Microsoft Surface creating evolution in the world of education QDS has been awarded with an extraordinary strategic solution project to create significant impact in the sector of education. The project is an alliance with the most prestigious educational organization, Supreme Education Council, Qatar. The vision of the project is to digitize the classroom which will be a dynamic shift in education. The project introduces a new technology, software, eLearning content and activities into the classroom. This amazing approach will allow students and faculty members to explore new ideas, challenge oneself through personalized learning paths and lastly, to express oneself in a completely different and unique way which was never done before. Therefore by sharing same perspective towards educational improvement, the two parties took initiative to deploy Microsoft technologies and Microsoft Surface devices. Introducing such technology to the classrooms will enhance reading, typing and learning experience of the students. This step assures the alteration of typical education mindset. Such triumph reflects QDS commitment to enrich the Qatari education system and give back to the community. Aruba Networks Installs One of the Middle East's Largest Wireless Networks for the Hospitality Industry at Ezdan Hotels West Bay in Qatar Enterprise-Class Wi-Fi Network Able to Support more than 32,000 Mobile Devices across 3,000 Guest Rooms and Hotel FacilitiesTuesday, October 28, 2014 5:00 am PDTDUBAI, United Arab EmiratesDUBAI, United Arab Emirates–(BUSINESS WIRE)–Aruba Networks, Inc. (NASDAQ:ARUN) has successfully completed one of the Middle East's largest wireless LAN projects in hospitality at the 3,000 room Ezdan Hotels West Bay in Qatar. In addition to enabling complimentary Wi-Fi services across the facility, the Aruba wireless overlay design dramatically cuts network cabling costs."Today Wi-Fi is an essential technology to satisfy travellers who expect to stay connected at all times," said Samer Habbouch, Territory Manager, Qatar at Aruba Networks. "Although most guests expect Wi-Fi to be a free service, they are quick to vocalize their dissatisfaction if the wireless quality is not up to mark. Aruba's enterprise-class mobility solution has enabled Ezdan to provide its guests with hassle-free, secure and reliable Internet access."According to Ezdan Hotels West Bay, the decision to select the Aruba wireless solution was based on the proactive support of Aruba Networks and its integration partner, Qatar Datamation Systems (QDS), and Aruba's ability to centrally manage and automate labor-intensive tasks. This was particularly important given the large size of the property, which made manually configuring and maintaining Access Points (APs) a significant challenge.While the Hotel continued to operate at full capacity, QDS completed the deployment in just three months avoiding any inconvenience to guests. QDS installed Aruba wireless across the entire facility including guest rooms, banquet halls, parking, pool and additional guest areas. Each AP was strategically deployed to extend wireless coverage to more than one room, reducing the number of APs and installation time to reduce overall cost. The Hotel utilized Aruba Mobility Controllers giving its IT team the ability to manage secure authentication, encryption, VPN connections, IPv4 and IPv6 services, and wireless intrusion protection for more than 32,000 mobile devices simultaneously.With Aruba's solution in place, Ezdan Hotels West Bay now has complete visibility and control of the network and devices on it from a single, easy-to-use interface. The Hotel's IT Team has also added comprehensive real-time monitoring capabilities to streamline troubleshooting and remediation by implementing Aruba AirWave Network Management. According to Aruba, AirWave allows the Hotel to 'identify and resolve problems in its wireless network before the issue results in helpdesk calls from guests'."Aruba's mobility solutions are centered around delivering enterprise-grade quality and performance in a cost-efficient package," said Samer Habbouch. "This huge project at Ezdan Hotels West Bay is further validation of our capabilities to meet #GenMobile mobility needs in the hospitality sector. The new Aruba infrastructure not only supports complimentary Wi-Fi for guests but can also be leveraged as a platform to generate new revenue streams through premium service offerings."Ezdan Hotels West Bay is a part of Ezdan Holding Group, which is featured among the world's leading organizations in Forbes Magazine's Global 2000 list. With the Hotel already reaping the benefits of Aruba's wireless network, plans are underway to replicate this success in other companies that are a part of the Group.About Aruba Networks, Inc.Aruba Networks is a leading provider of next-generation network access solutions for the mobile enterprise. The company designs

and delivers Mobility-Defined Networks that empower IT departments and #GenMobile, a new generation of tech-savvy users who rely on their mobile devices for every aspect of work and personal communication. To create a mobility experience that #GenMobile and IT can rely upon, Aruba Mobility-Defined Networks™ automate infrastructure-wide performance optimization and trigger security actions that used to require manual IT intervention. The results are dramatically improved productivity and lower operational costs.Listed on the NASDAQ and Russell 2000® Index, Aruba is based in Sunnyvale, California, and has operations throughout the Americas, Europe, Middle East, Africa and Asia Pacific regions. To learn more, visit Aruba at http://www.arubanetworks.com. For real-time news updates follow Aruba on Twitter and Facebook, and for the latest technical discussions on mobility and Aruba products visit Airheads Social at http://community.arubanetworks.com. We have been awarded Microsoft Partner of Year for Customer Satisfaction for two consecutive years. Also we are an HP Platinum Part and have won HP and Microsoft Outstanding Frontline Partner for 2014 in Virtualization & Private Cloud. QDS has been appointed as ADR for Microsoft Windows Surface for Qatar Qatar Datamation Systems (QDS) says the key facts: global launch of the new Microsoft SurfacePro 2 tablet will enhance its ability to o■er end-to-end solutions in mobility and Bring Your Own Devices (BYOD) functionality to address the productivity crisis in Qatar business.QDS today announced it has been appointed in a limited group of Authorised Device Resellers (ADR) providing the newly launched Surface 2 and Surface Pro 2 tablets, which bridge the gap between consumer-style entertainment tablets and full-featured business laptops.The Surface 2 and Surface Pro 2 quickly change from a tablet to laptop thanks to a two-position built-in kick-stand, multiple ports and click-on keyboard.A new optional accessory Surface Dock allows more device connections, while a Power Cover/Keyboard supplies extra battery power.The inclusion of more processing power and up to 8 hours of standard battery life means that Surface Pro 2 can deliver the full potential of the updated Windows 8.1 operating system."Surface Pro 2 is the missing link which leverages the full vision of Windows 8 as a business productivity tool," said QDS's GM Mr. Mohammad Alam."The new Surface will meet employee requirements for greater mobility while also enabling

creative work practices. This is a major step up from consumer targeted consumption devices."Mr. Mohammad Alam says Devices like the Surface deliver the human interface piece of the "Nexus of Forces" which Gartner Research has identi■ed as de■ning IT in the immediate future.Combined with the emergence of cloud computing and big data, demands for mobility and BYOD are rapidly changing the IT landscape."Providing employees with more ■exible IT solutions is vital to raising productivity, retaining talented sta■ and gaining a competitive edge," said Mr. Alam."Bringing Surface Pro 2 and Surface 2 to the Qatar commercial channel greatly extends the reach of our devices-and-services strategy, delivering our family of devices enabled by cloud services to more organisations than ever before."Mohammad Alam says the trend toward employee mobility is growing as we transition from "time as an input" business models to "output" based models."Businesses need to accommodate employees who want a mobile device that enables them to manage their business and social context whilst on the go.""Enabling this while also keeping corporate systems and data secure unlocks greater productivity with the workforce and creates application development opportunities which can further enable mobile workforces."The social behaviour of the IT user is now a major consideration and Surface Pro 2 can accommodate those trends." QDS has won Special project award of Polycom award in an FVC Annual Gala Award ceremony QDS won the Advance Weather Forecasting Project of Civil Aviation Authority Met Office The Qatar Civil Aviation Authority / Qatar Meteorology Department (QCAA/QMD) upgrades its weather forecasting capabilities by initiating a major new project. In an open tender where ten consortia from Europe, USA and Korea participated and presented very interesting solutions, the evaluation declared the informatics company Qatar Datamation Systems (QDS), in collaboration with the Greek partnership of Innovative Technology Center S.A. (ITC) and University of Athens (UOA), as the winner.The experience of an institute like University of Athens and its capability to provide high-level training to the QMD employees weighted heavily towards the final choice, alongside QDS's reputation as a leading informatics company in Qatar and Gulf Region. The Greek partnership is well known for successfully carrying out similar projects in Greece, Europe, USA, as well as other parts of the world including the Arabian Peninsula and Gulf region. Over the past eight years, it steadily provides a series of sophisticated meteorological and environmental prediction tools for numerous applications in the Gulf region. These tools (models) are well-known for their efficient predictions of desert dust and associated phenomena and can accurately predict day-to-day and extreme weather events. The setup of such systems needs to take place in a supercomputing system that will be assembled by QDS and maintained by QMD.Well known forecasting tools like SKIRON/Dust and WRF will be installed and provide the regional forecasts. The high-resolution system RAMS/ICLAMS is expected to provide state-of-the-art predictions such as wind shear and fog for the new airport of Qatar, whereas wave and ocean forecasting systems (WAM and MICOM, respectively) will provide the necessary marine predictions. The forecasts will be available both to Qatar citizens as well as to the industry of the country. The new international airport of Doha and the flag carrier Qatar Airways, together with Qatar Gas and Qatar Petroleum that make up the heavy industry of the country, are expected to be substantially benefitted by the accurate weather and environmental predictions.The Director of QMD Mr Ahmed Abdulla declared to be very happy having this contract assigned to the specific consortium, because of the state-of-the-art forecasting tools implemented, the training activities and the transfer of expertise. According to him, this weather forecasting system is the first step towards a bigger activity related to marine and environmental forecasting, monitoring of the seismic activity and other major environmental issues of the region. Both Mr Abdulla and Professor Kallos stated that their target is to make QMD the leading institute in the Gulf Region, one that will coordinate meteorological and environmental predictions. It is worth mentioning that Qatar will host the Marine Center and related activities of World Meteorological Organization, under Regional Association II (Asia, Gulf Region, and Arabian Sea).Click here to read more from http://www.raya.com/news/pages/c407b248-726f-4f45-9c79-d45b3185b5c5 Qatar Datamation Systems is a 2013 Microsoft Partner Award Winner (Dated 1st October 2013)For the second year in a row, Qatar Datamation System, LLC. is proud to announce that they are the Microsoft Partner Award Winner for Excellence in Customer Satisfaction in Qatar. The company was chosen from a Qatar based field of top Microsoft partners delivering market-leading customer solutions built on Microsoft technology."On behalf of QDS, we are honored to be the winner of the Customer Satisfaction Excellence Award,"

stated Mohammad Alam, General Manager, QDS. "This award validates our total commitment and dedication as an organization to deliver successful solutions based on Microsoft Technologies implementations for our clients. Our clients' recognition and Microsoft's recognition of our accomplishments, hard work of our employees, and commitment to advancing our clients' IT infrastructure with proven Microsoft technologies confirms our strategic business plan is successful and on course.""QDS's dedication to its clients and innovative Microsoft solutions has earned them the Customer Satisfaction Excellence Award two years in a row," said Mamoun Al-Bishtawi, SMS & P Lead, Microsoft Qatar. "QDS's client-focused deployment methodology has helped customers improve their infrastructure with a superior consulting experience. QDS does a phenomenal job in delivering world-class solutions that enhance and extend existing IT investments while producing valuable savings and improving productivity and processes."The Microsoft Partner Awards recognize Microsoft partners that have developed and delivered exceptional Microsoft-based solutions over the last year. Awards were presented in a number of categories, with winners chosen from a pool of almost 50 entrants from Qatar. QDS was recognized for delivering superior customer service based on an objective set of customer satisfaction surveys. State News Agency's New Private Cloud Leads to Optimum Computing Resource Use (Dated 23th July 2013)What happens with Qatar's largest news agency – Qatar News Agency – when there are simply too many servers to manage? Virtualization that's what! The move to virtualize wasn't all smooth however, the Agency faced storage constraints and used computing resources inefficiently. But, they overcame these hurdles to create a valuable network. This case study covers how Qatar News Agency tackled these problems, read it here. Media Giant Gains Better Business Visibility and Control Using an ERP Solution (Dated 20th May 2013)Have you ever wondered what happens with existing IT infrastructure when media giants merge? This case study looks at exactly that. When QMC (Quatar Media Corporation) merged business entities, they inherited legacy systems that needed to be updated. Curious about how they went about this and the results? Click here to read the case study on how this worked. QDS became the first Microsoft Business Intelligence Gold Certified Partner of Qatar QDS has recently become the first Partner in Qatar to be a Gold Business Intelligence Partner. Being the only Gold BI Certified Company we are demonstrating our ability to deliver solutions that leverage familiar tools to provide insight to everyone in our customers' organizations —at a lower total cost of ownership."As the only Gold Business Intelligence Partner we feel it really differentiates us from the competition and establishes us as a market leader, further demonstrating our commitment with Microsoft and also to serve the customer's needs that are relying on Microsoft-based solutions," said Mr. Mohammad Alam, General Manager, QDS.Microsoft research shows that BI continues to be a top spending priority for chief information officers (CIOs). As a partner with the BI competency, QDS demonstrates how accurate BI can provide a competitive advantage to our customers. We are also in a better position to meet some of our customers' most pressing needs—and drive services revenue—by taking advantage of the technology investments our customers already have, to help them build more effective business strategies.
